PCT/KR2004/001795

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-7</u>	YES
	Claims	<u>NONE</u>	NO
Inventive step (IS)	Claims	<u>1-7</u>	YES
	Claims	<u>NONE</u>	NO
Industrial applicability (IA)	Claims	<u>1-7</u>	YES
	Claims	<u>NONE</u>	NO

2. Citations and explanations (Rule 70.7)

1. Reference is made to the following documents:

D1: US 05886986 A

D2: JP 11191703 A

2. Claims of the present invention relate to a duplexer having a matrix structure comprising: a dual duplexing means including a transmitting input unit, a receiving input unit, a transmitting output unit and a receiving output unit, wherein the above devices are used in common and connected in the form of a matrix.

3. D1 relates to a duplexer having dual coupler line characteristics improvingly damping the signal of receiving frequency with a small number of resonators and without an external device. D2 relates to an apparatus and method for obtaining a small-sized dual-band dielectric filter and a dielectric duplexer with a built-in resonator independently designed in each mode.

4. However, D1 & D2 do not have the characteristics of the present invention. More specifically, none of the prior arts teach or fairly suggest the claimed dual duplexer having matrix structure of the claimed invention, where the transmission input and receiving input, the transmission output and receiving output use a common port, and are connected with each other in a matrix structure.

5. It is thus believed that Claims 1-7 meet the criteria set out in PCT Article 33(2)-(4). The prior arts D1 & D2 do not teach or fairly suggest any of the specially set forth points in the claims.

Therefore, Claims 1-7 are considered to be novel, to involve an inventive step and to be industrially applicable.
